GREAT LOOM END SALE!

OUR BUYER Has just returned from the Markets, where he met several agents of the largest mills in the United States. Because it was late in the season they closed out an enormous lot of Loom Ends at considerably less than the cost of manufacture. Every Factory and Mill in the manufacture of their product accumulate short ends from the looms, one-half to 10 yards in length. These short ends are laid aside until the end of the weaving season, then they are tied up in great bundles and disposed of by weight—so much for a hundred pounds, instead of so much a yard, the price always

being less than the actual cost of the raw material they are made from. Loom ends accumulate in all Mills, therefore careful, hard-working buyers can secure loom ends of every conceivable kind of piece goods that is made.
